Ministry of Oil & Gas

NPCC

9 - 10 December 2014

Al-Bustan Palace Hotel, Muscat, Sultanate of Oman

Unlocking and capitalising on the Sultanate's booming offshore hydrocarbons sector

Key Speakers:

- Dr. Kenneth Gerard Pereira, Managing Director, **Hibiscus Petroleum**
- Dr. Anil Chopra, Founder & Chairman, **PetroTel Inc.**
- Hans Lidgren, Chairman, **Masirah Oil**
- Dr. Rabi Bastia, Vice President, Exploration, **Masirah Oil**
- Aqeel Madhi, Chief Executive Officer, **National Petroleum Construction Company (NPCC)**
- Dr. Herman Franssen, International Gas Consultant, **South Asia Gas Enterprise (SAGE)**
- Sudhir Vasudeva, Former Chairman & Managing Director, **Oil and Natural Gas Corporation Limited (ONGC)**
- Philip Cooper, Global Technology Director INTECSEA, **Worley Parsons**
- Steve Henzell, Offshore Topsides Global Sector Lead, **Worley Parsons**

Benefits of attending Offshore Development Oman 2014:

- **UPDATE** yourself with the latest offshore oil and gas opportunities in the Sultanate
- **NETWORK** and close business deals and get connected with business professionals and government officials from Oman's offshore industry
- **UNDERSTAND** the trends and challenges in Oman's offshore industry
- **EXPLORE** the most effective ways to collaborate for successful basin exploration
- **ACQUIRE** answers to all of your offshore E&P questions at one event
- **HEAR** from successful case studies giving you the clearest industry picture
- **EVALUATE** the myriad productions and solutions available for offshore E&P
- **TAKE** part in discussions about the future of the Sultanate's offshore industry
- **DISCOVER** the investment climate and new development opportunities directly from senior government officials from the Sultanate

Offshore Development Oman 2014

9 - 10 December 2014
Al-Bustan Palace Hotel, Muscat, Sultanate of Oman

Unlocking and capitalising on the Sultanate's booming offshore hydrocarbons sector

Dear Colleague,

The recent discovery of hydrocarbons is a significant step towards the deepening of our knowledge and understanding of the offshore geology in the east of Oman. The results from this well are vital for the future development of this block. This discovery confirms the high quality and value of the Oman asset. There has been a call to attract foreign investment in offshore blocks for a number of concessions offered by the Omani government for exploration and development.

With the Sultanate's offshore industry rapidly growing, Offshore Development Oman 2014 will play an important role in the expanding market and provides a conference dedicated to the advancement of the offshore industry, whilst addressing technological challenges associated with safely and cost effectively developing oil and gas resources.

ODO 2014 will provide a detailed analysis on the design, engineering and construction, operation and maintenance, risk and safety parameters associated with various types of offshore projects. With unique challenges in each of these fields, this event will look at the best platform to support the requirements of the field, and the engineering and technological requirements to establish and operate.

ODO 2014, the region's premiere technical forum focused exclusively on the Sultanate's offshore oil and gas industry, will showcase the most innovative technologies and ground-breaking solutions within the offshore exploration and production industry. The conference will deliver the latest technological innovations, solutions and lessons learned from leading industry professionals and will focus on the process of managing major projects with its inherent cost implications.

This conference is focused on the increasing interest in the Sultanate's emerging hydrocarbon potential. Recent drilling offshore success in Oman is spurring interest from major operators and independents alike. ODO 2014 will discuss the strategic, commercial, technology and regulatory issues that will shape the future of the development and commercialization of the deep and ultra-deepwater oil and gas industry in the Sultanate of Oman.

Kind regards,
Maneesh Nair
Conference Director - Offshore Development Oman 2014

Who should attend Offshore Development Oman 2014?

This conference is designed for the following professionals:

- Government authorities
- Oil and Gas operators and investors
- Offshore drilling companies
- OEMs & contractors
- Sub-contractors
- Engineering and construction companies
- Classification societies
- Equipment and technology providers
- Consultants
- Service and equipment suppliers

Who will you meet at Offshore Development Oman 2014?

- Director Generals
- Chief Executive Officers/Presidents/Managing Directors
- Chief Operations Officers/Directors
- Chief Technical Officers/ Vice Presidents - Technical
- Offshore Production Technology Vice Presidents/ Directors/ Managers
- Operations/ Engineering/ Offshore Projects Directors/ Managers/ Team Leaders
- Strategic Development Directors/Managers
- Design (R&D) Directors/Managers
- Vice Presidents / Directors/ Managers for Deepwater/ Subsea
- Heads/ Directors of Business Development & Sales
- Heads of Safety/ Safety Managers/ Quality Assurance
- Geologists

Global Exhibitions and Conferences has been organising successful and value adding conferences, trainings, exhibitions to cater different industries' needs. Our conferences aim to find the solutions for the challenges that different sectors face. Working in close partnership with ministries, public authorities, private organisations and corporate bodies, we pride ourselves on offering world-class exhibition and conference solutions. GEC's standing as one of Oman's leading event management firms is borne out by its success in assembling an outstanding portfolios of conferences, trade expos and exhibitions, many of which have since evolved into signature industry events. www.gecexpo.com

Offshore Development Oman 2014 | Tuesday 9th December 2014 – Day one

08:00 Registration and networking

08:50 Chairman's opening speech

Reviewing the underexplored hydrocarbon sector in the Sultanate of Oman - Exploring Oman's offshore Oil & Gas potentials

09:00 Keynote: Understanding Government's strategic goals in exploration and offshore development What measures to take for offshore development in the current economic situation?

- Hydrocarbon production regulations: What are the latest changes in the offshore production legislation and innovation implementations?
- Overview of the key regions for offshore upstream development: What opportunities are offered to investors and suppliers? The investment climate, prospects of public-private partnership, plans of infrastructural development in the country
- Attracting investment in offshore upstream projects in the Sultanate

Reserved for Ministry of Oil & Gas, Oman

09:15 Exclusive presentation – Presenting the vision and technology of Masirah Oil in developing offshore fields in Oman

Hans Lidgren, Chairman, Masirah Oil Limited

09:20 Understanding the offshore exploration scenario in Oman – A case study on Offshore Block 50

- Presenting the updates of Block No. 50
 - Providing an insight into Masirah Oil's experience and how it can be utilised by other operators in the Sultanate
- Dr. Kenneth Gerard Pereira, Managing Director, Hibiscus Petroleum

09:40 Exclusive presentation from National Petroleum Construction Company (NPCC)

Aqeel Madhi, Chief Executive Officer, National Petroleum Construction Company (NPCC)

10:10 Interactive panel discussion: Implementation of offshore mega projects in Oman: Analysing the challenges and opportunities

- Understanding the importance of offshore projects for the Sultanate's energy strategy
- Creating JVs and partnerships with international players
- Analysing project opportunities and challenges in deepwater and offshore upstream projects
- Key offshore projects realization in the Sultanate: Current status and prospects
- What are the future trends of global oil and gas exploration?
- Improving local skills and technologies
- Dealing with the biggest challenges in Oman's offshore sector

10:30 Official exhibition inauguration and morning networking break

11:00 Evolving frontier of eastern Oman offshore: Understanding the challenges and opportunities – an insight from Masirah Oil

Dr. Rabi Bastia, Vice President, Exploration, Masirah Oil Limited

11:30 Understanding the unexplored hydrocarbon potentials in offshore Oman

- Improving image technology and seismic processing workflow design to permit better constraints on extrapolating shallow water exploration
- Exploring the deep and ultra-deep waters of offshore Oman
- Providing a powerful tool in understanding the complex geological processes offshore Oman.

12:00 Understanding the offshore geology in Oman and exploring, finding, and producing oil in an economically and environmentally sound manner

- Discussing the environmental problems of offshore production and their solutions
- Providing environmental support to Oman's offshore upstream projects
- Management of pollution from offshore industry and understanding the environmental impacts

12:30 Accelerating seismic exploration: Understanding subsurface complexity for further successful project development

- Providing a unified approach to interpret and correlate borehole and seismic data in the offshore blocks.
- Discussing the latest updates on seismic activities in the coast of Oman
- Analysing the latest innovations in 3D (and 4D) seismic data acquisition and interpretation
- Overview of the latest technologies available to characterise reservoir

13:00 Networking lunch

14:00 Exclusive cast study: Building a deepwater, transnational, natural gas pipeline from the Middle East to India

- Presenting the SAGE project- The Middle East to India Gas Pipeline
- Providing a safe, economic and reliable means of building the pipeline to supply gas

Dr. Herman Franssen, International Gas Consultant, South Asia Gas Enterprise (SAGE)

Sharing successful and best practice case studies on successful offshore partnerships from NOCs and IOCs from around the globe

14:30 Presenting the Satah Al Razboot (SARB) Full Field Development Project – An insight from Abu Dhabi Marine Operating Company (ADMA-OPCO)

- Enhancing oil production in line with Abu Dhabi's development strategy
- Providing an outline on the SARB project and the current updates
- Understanding the key success factors of the first offshore digital intelligent oil field development with a state-of-the-art technology in automated facility in the UAE

15:00 Networking break

15:30 Presenting the second largest offshore oilfield and the fourth largest oilfield in the world – A case study on the Upper Zakum Oilfield

- Increasing the oil and gas production capacity and upgrading the field's existing infrastructure
- Working with consultants and contractors for the field development – Realising the best practices
- Initiating engineering solutions to eliminate waste - managing waste materials throughout the full project life cycle - from exploration to decommissioning.

Maximising local content: A necessity and an opportunity

16:00 Developing a world-class local workforce required for the oil and gas industry in the Sultanate

- Integrating an In-Country Value (ICV) programme to develop Omani skills and capabilities in offshore projects
- Setting standards and expectations for the offshore oil and gas industry
- Enhancing the employability of Omanis by equipping them with the right skills
- Acquiring, training and retaining young talent and a skilled workforce

17:00 Chairman's closing remarks

17:15 End of conference day one

Offshore Development Oman 2014 | Wednesday 10th December 2014 – Day two

08:00 Registration and networking

08:50 Chairman's opening speech

09:00 Understanding the deepwater drilling opportunities in Oman

09:30 Understanding the key objectives and phases involved in an offshore project commissioning effort

- Providing an excellent safety performance and bringing no harm to the environment
- Delivering facilities that meet the design intent
- Testing, verifying and certifying of components and systems
- Building competence of operations team by including them in the commissioning activities in order to avoid re-work or duplication of work

Understanding the game changing technologies in offshore exploration & production

10:00 Investing in subsea technology: Enhancing production technology in deepwater developments and operation of subsea assets

- Installing suitable solutions to sustain successful flow assurance at subsea level
- Understanding new subsea technologies needed to maximise deeper water developments
- Outlining early phase system engineering activities
- Evaluating performance, value, technical maturity and overall risk

Reserved for Worley Parsons

10:30 Adopting innovative technologies and equipment for offshore development in the Sultanate

- Modern technologies and equipment for offshore exploration under the severe climate conditions
- Innovative technological solutions in design, construction and servicing of subsea systems and infrastructure

11:00 Morning networking break

11:30 4D Seismic Technology: A Valid and Valuable Reservoir Management Tool

Analysing the benefits of other industries due to the development of offshore sector in the Sultanate

12:00 Interactive panel discussion: Understanding the impact of offshore exploration and production on other industries in the Sultanate

- How are offshore exploration and production projects impacting the shipping industry?
- Showcasing the opportunities for ports in supporting offshore field development in the Sultanate
- Understanding the opportunities for ports to support the supply chain and help secure the future of Oman as an offshore industry leader.

12:30 Providing a support programme for the development of SMEs in the Sultanate

- Improving the quality of relationships with the SMEs
- Integrating into the Sultanate by solidly contributing to maintaining and creating employment and economic growth opportunities
- Showcasing the social responsibility in developing the local suppliers and products for the offshore projects in the Sultanate

13:00 Networking lunch

Organisation of effective cooperation between operators, suppliers and contractors within the framework offshore projects realisation

14:00 Interactive panel session: Creating a synergy between offshore operators and contractors

- Maximising contractor-operator relationships to optimise safety and ensure alignment to SEMS
- Optimising worker competency by utilising the best vendors on the platform and making sure they are following SEMS rules
- Incorporating new tools such as modules, checklists and accreditation prerequisites as guidelines of compliance for drilling contractors
- Analysing the importance of communication across all levels from operators up to senior level executives to ensure customized dashboards and reporting for every level

14:30 Analysing the challenges international contractors face from tendering process to project execution

- Identifying regulatory compliance challenges facing international EPC contractors operating in Oman
- Managing risks associated with joint venture projects between local and international stakeholders
- Selecting and managing local partners and suppliers

15:00 Networking break

HSE in offshore exploration and production

15:30 Implementing effective Health and Safety measures for the Oman's offshore community

- Understanding the professional relationship: HSE and Oman's oil and gas offshore community
- Implementing an HSE strategy to ensure risks are identified and managed
- Sustaining a safe environment for all Oman subsea assets and structures

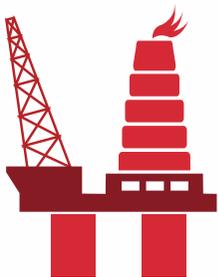

16:00 Discussing effective emergency response practices to respond to emergencies arising from offshore fields

- Learnings from major incidents such as the Deepwater Horizon
- Integrating information technology into emergency response systems
- Implementing a global emergency response support system
- Taking training to the next level using simulators

16:30 Chairman's closing remarks

16:45 End of conference

The published programme is correct at time of printing. However, given the seniority of our speakers and the nature of their roles, speakers may subsequently substitute or remove themselves from the programme. This is always regrettable, and we will always try to replace the speaker with a speaker with equivalent insight. For the most up-to-date programme, please visit the event website.

Why Offshore Development Oman 2014?

With the recent discovery of hydrocarbons in the east of Oman, this discovery is a significant step towards the deepening of our knowledge and understanding of the offshore geology in Oman. The results from this well are vital for the future development of this block and hence confirm the high quality and value of the Oman assets. There has also been a call to attract foreign investment in offshore blocks for a number of concessions offered by the Omani government for exploration and development.

The newly allocated projects will include design, engineering, construction, operation, maintenance, risk and safety aspects. With many challenges to overcome in each of these fields, the operators, consultants and contractors will look at implementing the best possible approaches to develop a successful offshore project. Hence Global Exhibitions and Conferences LLC is bringing together all the stakeholders involved in the offshore projects to create a dialogue among them and successfully step-up the Offshore operations in Oman.

Why sponsor ODO 2014:

- **Interact** with clients and potential new customers
- **Engage** with key decision makers who are looking for solutions for their upcoming projects
- **Take** part in discussions about the future of Sultanate's offshore industry
- **Display** your latest products and brochures at the exhibition/networking space
- **Pre-qualify** the participants from a list of over 200 you wish to engage on a 1-1 meeting during the conference
- **Stay** on top of your competition by choosing packages meeting your requirements
- **Make** a long-lasting impact on your target audience through presentations
- **Capture** immediate feedback on new technologies, services or product requirements
- **Stay** on top of industry trends
- **Acquire** leads and close sales

Do you have a product or service that our senior decision-makers and influencers need?

Do you belong to one of the categories below?

- Offshore Operators
- EPC Contractors
- Subcontractors
- EPC (Engineering/Procurement/Construction) Main Contractor
- Pipeline/Installation Contractor
- Oil Spill Service Providers
- Safety Companies and Services Providers
- Offshore Drilling Companies

If yes, this is a conference you cannot afford to miss.

To know more about the various options that could potentially help develop your business, please contact **Mr. Satish Anand** on +968 9913 4984 or email at satish.anand@gecexpo.com

Offshore Development Oman 2014 offers product suppliers and service companies an opportunity to extend their business offerings to the participating delegates. Suppliers and service companies can participate through various options and can avail benefits such as:

- Conducting a presentation on their offerings to the key decision makers
- Displaying their products/services in the networking/exhibition space provided
- Convincing the key decision makers during their one-on-one meetings at their networking/exhibition space
- Branding their company as one of the leading suppliers or service providers for Offshore energy projects
- Accessing the delegate list one week before the conference to prepare themselves
- Marketing their company through the event website, brochure and other event marketing mediums

TEAM DISCOUNTS

Bring your colleagues to attend Offshore Development Oman 2014 conference and save money. Team discounts are available for three (3) or more attendees from the same organisation. All organisations must pre register their team members by November 20. Team discounts are not available at the on-site registration

CONFERENCE DOCUMENTATION

If you cannot make the conference, you can still access all presentations delivered throughout the conference days for just OMR 200, post event. Contact us on +968 2478 3800 for further details.

GEC's STANDARD TERMS AND CONDITIONS

- The conference registration fee does not include hotel accommodation and travel costs.
- Payment is due in full at the time of registration and includes lunches, refreshments and certificates
- Your registration will not be confirmed until payment is received and may be subject to cancellation.
- If a booking is received within ten(10) working days before the conference a credit card number will be required to confirm your place, likewise if full payment has not been received before the conference date.
- Any other discounts including group discounts offered by GEC must also require payment at the time of registration.
- You may substitute delegate at any time by providing reasonable advance notice to GEC.
- For any cancellations received in writing not less than ten(10) days prior to the conference, you will receive a 90% credit to be used at another GEC conference. An administration fee of 10% of the registration fee will be retained by GEC for all permitted cancellations. No credit will be issued for any cancellations occurring within 9 days of the conference.
- In the event that GEC cancels an event for any reason, you will receive a credit for 100% of the registration fee paid. You may use this credit for another GEC event to be mutually agreed with GEC, which must occur within one year from the date of cancellation.
- In the event that GEC postpones an event for any reason and the delegate is unable or unwilling to attend on the rescheduled date, you will receive a credit for 100% of the registration fee paid. You may use this credit for another GEC event to be mutually agreed with GEC, which must occur within one year from the date of postponement.
- Except as specified above, no credits will be issued for cancellations. There are no refunds given under any circumstances.
- GEC is not responsible for any loss or damage as a result of a substitution, alteration, cancellation or postponement of an event. GEC shall assume no liability whatsoever in the event this conference is cancelled, rescheduled or postponed due to a fortuitous event, Act of God, unforeseen occurrence or any other event that renders performance of this conference impracticable, illegal or impossible. For purpose of this clause, a fortuitous event shall include, but not limited to war, fire, labour strike, extreme weather or other emergency.
- The speakers and topics are confirmed at the time of advertisement. However, circumstances beyond the control of the organisers may necessitate substitutions, alterations or cancellations of the speakers and/or topics. As such, GEC reserves the right to alter or modify the advertised speakers and/or topics if necessary.
- Any substitutions or alterations will be updated on the conference brochure at the earliest. This agreement shall be governed by and construed according to Omani Law. Any dispute between the parties under this Agreement hereby submits to the jurisdiction of the Omani courts
